# THE SOURCE

## HERITAGE

Bottled and distributed since 1894, Acqua Filette has been exported worldwide since 1930, earning numerous awards and accolades, and establishing itself not only as a healthy and healing water but also as an exclusive product chosen by the most prestigious national and international hotels, restaurants and wine bars.

The first historical records of the source date back to 400 BC and indicate that it was already known to the Romans, who dedicated it to Venus as a symbol of the bond between the goddess and the vital element of water.

Roman legionaries returning from Eastern campaigns would visit the spring to regenerate, as it was considered both healthy and curative.

Purity.

## VALUES

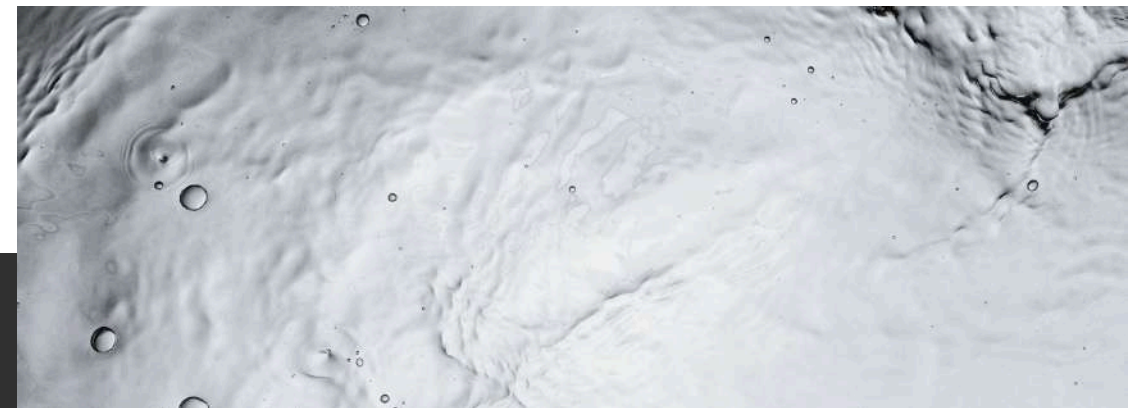

**Filette is one of the purest oligomineral waters on Earth.**

It flows crystal-clear from the Guarcino spring at an altitude of 900 meters above sea level, set against the backdrop of the Lazio Apennine Mountains — far from industry, traffic, fertilized fields, and pastures.

## QUALITY

Balance.

The uncontaminated terroir allows Filette to be certified **arsenic-free** and virtually nitrate-free — a rare distinction that sets it apart globally. Arsenic, a Group 1 carcinogenic element according to the WHO, is commonly found in most natural waters, making its total absence in Filette exceptionally rare and valuable.

Distinguished by its low sodium content and a perfectly balanced level of total dissolved solids (TDS), Filette possesses a **refined mineral profile**.

Its gentle character on the palate makes it the ideal companion to fine wines and champagnes, subtly enhancing their persistence, elegance, and aromatic depth.

Furthermore, Filette is composed by **very small clusters** (the groups of molecules that make up water), that give greater capacity to permeate and purify tissues, allowing the balanced re-mineralization of the body.

# COMPARISON CHART

note: the list is presented in alphabetical order

ARSENIC: is classified by the International Agency for Research on Cancer as a category 1 (thus certain) carcinogen; DL 31/2001 and the EU Directive 2003 indicate 10 µg/l as the legal limit.

NITRATES: the presence of nitrates in water is an indication of groundwater pollution, caused by fertilizers and nitrogen compounds in general; nitrates can combine with proteins to form nitrosamines, carcinogenic substances; the Ministerial Decree of 29/12/2003 On Mineral Waters sets a limit of 10 mg/l of nitrates for infants; the EPA (U.S.A.) and in conjunction with the World Health Organization recommend a limit of 10 mg/l.

TOTAL DISSOLVED SOLIDS (TDS): the TDS indicates the mineral salts contained in the water; the National Association of Biologists has clarified that oligo-mineral waters can be considered optimal if they have a TDS between 200 and 300 mg/l, waters that are neither too rich nor too poor in mineral salts.

SODIUM: a value of less than 5 mg/l is suitable for low-sodium diets and to fight hypertension and water retention.

ND: undeclared, not available.

The extraordinary characteristics of this product have led to the birth of the *Water Like Wine* project.

The goal of this project is to make the consumer understand that waters are not all the same, and they can have unique characteristics that distinguish them in terms of quality and taste, just as happened for the wine world 40/50 years ago.

# WATER LIKE WINE PROJECT

Acqua Filette

Filette's mission: give to water the same value and dignity the market devotes to wine and champagne.

Filette has been a pioneer of this.

This process of culture and attention to water has led to the emergence of dedicated professionals. Bottled mineral water is following the same evolutionary path as wine. There is now the figure of the hydro-sommelier, the water sommelier, and there are courses that teach how to start this profession, in order to appreciate this precious beverage in every aspect.

# THE COLLECTION

Acqua Filette

# 4

The collection's iconic formats elevate Filette to new heights and allow it to reveal itself in all its nuances, elegantly accompanying every moment.

The organoleptic characteristics that the nature has given to Acqua Filette source are the starting point from which the entire Filette bottling project is developed.

The purpose of the packagings is to persuade the consumer to pay attention to the product, to its quality and to conceive the water in a new way.

# LA BORDOLESE

Acqua Filette

Primeness.

|  
S  
~

**More than a bottle, a true declaration of quality.**

Inspired by the shape of the most prestigious wine bottles, La Bordolese has always emphasized the excellence and nobility of Filette: a water to be tasted, to be appreciated in its aroma, palatability and lightness, just like great wines.

The Bordolese can be tasted in **three different versions**: Naturally Still, Gently Sparkling and Very Sparkling. and in **two sizes**: 750ml and 375ml

# LA SPIRIT

## A statement of character and distinction.

Inspired by the aesthetics of the most exclusive English gin bottles, this bottle was created for all those refined settings where the perfectly balanced taste of Acqua Filette can accompany a fine wine, a rare spirit, a sophisticated cocktail — or simply, a delightful conversation.

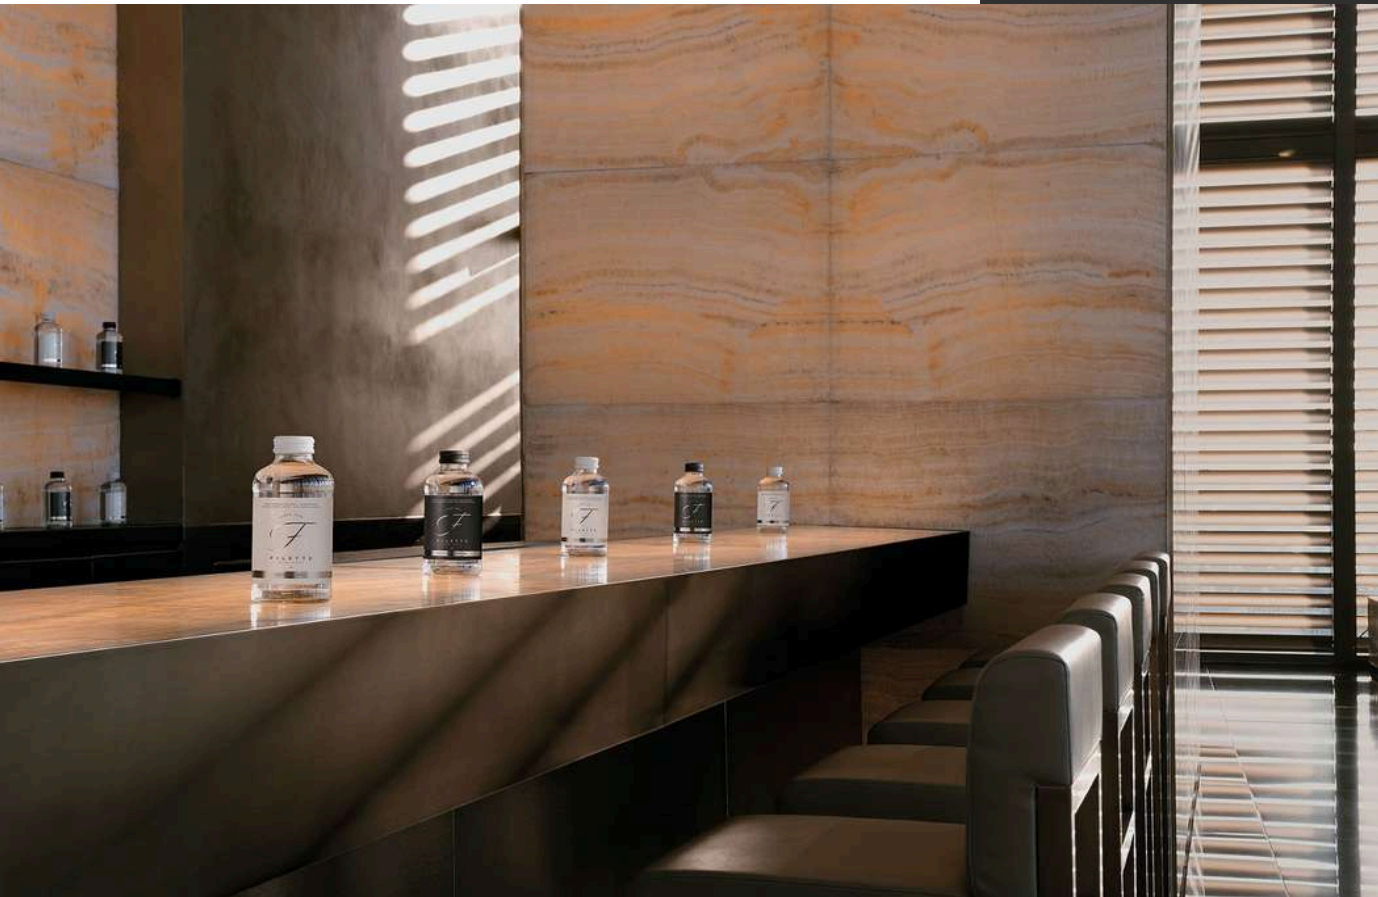

An unusual format, both in design and volume, crafted to please even the most discerning palates.

Prime Water

## Refined.

The Spirit can be tasted in **two different versions:**  
Still and Sparkling  
and **two sizes:** 660ml and 470ml

Light.

# LA FUTURA

Acqua Filette

**The shape of purity, designed for tomorrow**, and a thanks to nature for giving us one of the purest water source on Earth, as well as the bottle born to fight plastic pollution. This fully recyclable aluminum packaging is designed to allow everyone to enjoy the quality and taste of Acqua Filette while respecting the environment.

A light bottle for the Planet and, because of its extremely low weight, for those who choose to carry the purity of Filette with them at all times.

The Futura can be tasted in **two different versions**: Still and Sparkling and **one size**: 473ml

SOME OF THE EXCLUSIVE PARTNERS  
WHO HAVE CHOSEN FILETTE

Filette brings the perfection of its mineral waters  
to the tables of the world's greatest gastronomic  
excellences. In over 30 countries, ranging from  
institutions, restaurants and hotels, to partnerships  
with great sommeliers and chefs, Filette has now  
become synonymous with exclusivity and purity.  
Discover all the top names that have chosen Filette  
in Italy and around the world on [www.acquafilette.it](http://www.acquafilette.it)

ARMANI  
Hotel Milano

We would like to thank Armani Hotel Milano  
for their cooperation during the photo shoot.

# — ENVIRONMENT

## ZERO PLASTIC PROJECT

Purity is a key value for Acqua Filette, and it deserves to be preserved in everything we do.

This is why we decided to embark on a true plastic-free movement to protect the Earth and its most precious commodity: water.

With the choice of bottles made exclusively of glass or aluminum, single-use plastic was abandoned in favor of 100% plastic-free and 100% infinitely recyclable materials, which fully maintain the organoleptic qualities of the water.

The continuous evolution of the project can be followed in the section “environment” on [www.acquafilette.it](http://www.acquafilette.it)
